

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) ~~Portable~~ A portable electric torch ~~comprising torch,~~
comprising:
_____ a lighting module with light-emitting ~~diodes-LED,~~ diodes;
_____ a switch to control lighting of the ~~diodes,~~ diodes;
_____ means for modifying ~~the light~~ a light beam emitted by the diodes through a window of ~~the housing,~~ a housing; and
_____ ~~comprising~~ optical transmission means mounted swivelling around a swivel pin securely fixed to the housing allowing a limited swivelling movement between an inactive position away from the diodes and an active position situated facing the diodes,
_____ the swivel pin extending substantially parallel to ~~the direction~~ a direction of alignment of at least two ~~diodes-~~ diodes, being arranged under the diodes, and being located from the window at a fixed distance, in the active position and the inactive position of the optical transmission means, that is larger than a distance form the diodes to the window.
- 2-4. (Canceled)
5. (Currently Amended) ~~Portable~~ The portable electric torch according to claim 1, wherein the front face of the housing comprises a rim acting as bearing surface for the optical transmission means when the ~~latter~~ optical transmission means are in the inactive position.
6. (Currently Amended) ~~Portable~~ The portable electric torch according to claim 1, wherein the optical transmission means comprise a colored filter.
7. (Currently Amended) ~~Portable~~ The portable electric torch according to claim 1, wherein the optical transmission means comprise a lens.

8. (Currently Amended) ~~Portable~~ The portable electric torch according to claim 1, wherein the optical transmission means are provided with a gripping finger at ~~the top~~ a top part and with a cylindrical protuberance at ~~the bottom~~ a bottom part constituting said swivel pin.

9. (Currently Amended) ~~Portable~~ The portable electric torch according to claim 1, wherein the window of the housing remains open in said inactive position and is blanked off by the optical transmission means in the ~~other~~ active position.
